DISCOVER
BLOMBERG

Established in 1883 in Germany, Blomberg
has more than 130 years of delivering
quality and innovation.

With a focus on intelligent solutions, energy
efficiency, and materials of the highest quality,
our goal is to blend contemporary European
design with cutting-edge performance
and create home appliances that function
beautifully in living spaces of all sizes.

IN HARMONY WITH NATURE, YOUR LIFE, AND YOU.

IN HARMONY
WITH NATURE

Blomberg understands living well also means living intelligently and responsibly. It's a distinction that earned us the **ENERGY STAR® 2018 Partner of the Year** award. Additionally, select ENERGY STAR products meet specifications set by the **Consortium for Energy Efficiency (CEE)** as listed by the **Super Efficient Home Appliances Initiative (SEHA).**

Meets CEE Specifications

ENERGY STAR
AWARD 2018
PARTNER OF THE YEAR

IN HARMONY
WITH YOUR LIFE

Inside your home, Blomberg appliances do more than exude sophistication, thoughtfulness, and cutting-edge technology. From the kitchen to the laundry room, our intelligent solutions harmonize with your life and create the balance between beautiful form and the functional excellence your active lifestyle demands.

IN HARMONY
WITH YOU

Blomberg products are designed with a refined European sensibility that aesthetically blends with whatever high-end style inspires you. The distinction is in the details, the unwavering emphasis on quality, and a level of ease and execution that reflects what really matters to you.

CONTENTS

COOKING

Whether electric, gas, dual fuel, or induction,

Blomberg ranges not only elevate functionality

to new levels, they also enable every cook

to create like a chef. The difference is in the

details that transform an appliance into a

harmonious part of your home.

CONTEMPORARY EUROPEAN DESIGN

Blomberg ranges bring sophistication, thoughtfulness, and cutting-edge technology to the kitchen, harmonizing elegance with chef-worthy functionality and the effortless style your upscale home deserves. This balance is evident in every feature, from the sleek oven handle and sculpted ergonomic knobs, to the beautiful LED lights under the bullnose that illuminate the controls and the programmable electronic timer. These innovative features have made Blomberg the winner of the prestigious iF Design award, which has been globally recognized as a symbol of design excellence for over 65 years.

Features available on select models only.

TRUE EUROPEAN CONVECTION

Blomberg's advanced convection system features an additional dedicated heating element around the cooking fan to circulate warm air evenly, creating a three-dimensional cooking effect that works consistently on every rack. Roasts and casseroles cook faster and more uniformly. Baked goods are evenly browned and beautiful. Multiple dishes cook to perfection at the same time with no mixing of flavors or aromas.

SPECIAL PROGRAMS

Blomberg caters to the executive chef inside every home cook by offering professional-level assistance in the kitchen. Simply select one of the special preset options from the display menu for proofing bread, baking amazing pizza, or roasting the prime turkey, and the oven determines the correct cooking mode, temperature, and timing for you.

MEAT PROBE

This is the secret to perfect roasts every time. The programmable meat probe accurately measures the interior temperature when the oven is in use. You know exactly when it's done just the way you like it — rare, medium, or well done — without constantly checking or opening the oven door.

INTERIOR LIGHTING

For full visibility while baking, braising, and roasting, Blomberg ovens feature superb interior lighting, including bright Halogen lamps and a non-reflective enamel surface that reduces glare on the glass oven door.

INDUSTRY-LEADING OVEN CAPACITY

Blomberg knows you can never have too much room in your oven, especially when you're entertaining. That's why we feature the largest oven capacity available in a 30-inch range, with 5.7 cu. ft. of cooking space to accommodate everything from holiday roasts to full-size commercial baking sheets. Dual interior lights and a large viewing window make it easy to monitor what's cooking.

3 HEAVY-DUTY WIRE RACKS

For easy combo cooking or baking more than one tray of homemade cookies at a time, our oven features three heavy-duty wire racks. Each one is built to handle everything from feather-light pastries to hearty hams and scrumptious sides that feed a crowd.

COOL-TOUCH OVEN DOOR

Blomberg ranges feature cool-touch glass on the oven door to prevent accidental burns and safely protect those small, curious fingers tempted to point out the cookie they want first!

XL COOKING ZONE

Blomberg electric ranges with sleek, solid-surface cooktops offer more than a beautiful appearance and the benefit of effortless cleanup. They feature the versatile advantage of allowing you to create an extra-large,12-inch cooking zone for fast, efficient cooking in oversize pots and pans of any shape, as well as with stovetop griddles.

THE INNOVATION OF INDUCTION

Cook with precision. Innovative induction technology uses an electromagnetic field below a sleek, easy-clean glass cooktop surface to generate heat directly within the cookware (it requires induction-capable steel pots and pans to activate). Faster than radiant heat, induction cooks foods quickly and evenly and offers a wide range of temperatures for greater control. Once the pan is removed, the cooking zone cools down rapidly, using less energy. Additional safety features prevent children from turning on the cooktop surface.

Features available on select models only.

AUTO REIGNITION

Blomberg ranges are designed to be intelligent as well as stylish and efficient. Should a gust of wind, a spill, or a boil-over extinguish the burner flame at any time during cooking, safety is built in with automatic reignition.

INTEGRATED ELECTRONIC IGNITION

Igniting a Blomberg gas burner is much quicker and easier because the starter is integrated into the knob. Simply press and turn a burner knob for instant auto ignition and you are ready to cook.

POWER BURNERS

Cooking at just the right temperature is a skill often acquired over years of practice, but Blomberg makes it automatic for anyone. Our ranges feature double simmering burners that can be set to cook at precise temperatures. A power burner (front right) delivers 20,000 BTU for rapid boiling and browning. A simmering burner (rear left) provides gentle, low heat for sauces, rice, or melting chocolate like a pro.

CAST IRON GRATES & PAN SUPPORTS

For top performance, Blomberg uses high quality cast iron grates atop its sealed burners. Durable and practically indestructible, the supports promote even heating and cooking and can withstand high temperatures.

GAS SAFETY VALVE

All Blomberg gas ranges feature oven broilers equipped with a gas safety device that automatically cuts off the gas supply if it senses the broiler flame has been accidentally extinguished while you're cooking.

PROGRAMMABLE SELF-CLEAN OVEN

Time is the ultimate luxury, and Blomberg ranges protect yours with high-tech, programmable self-cleaning oven technology that lets you set the right cycle. Set it for three hours, four hours, or five hours depending on the level of cleaning required. There's no need to scrub hard-to-reach surfaces, scrape stubborn spills, or use harsh chemicals. At the end of the cycle, simply wipe away ash with a cloth.

FULL EXTENSION TELESCOPIC BOTTOM RACK

Blomberg has designed its oven rack system to provide ergonomic, easy, and accident-proof access to whatever you're cooking. The telescopic shelf system with extending arms allows full bottom rack extension, so even heavy casseroles or roasting pans glide out without effort, while an integrated stop mechanism guarantees your safety.

30" PRO-STYLE INDUCTION RANGE

BIRP34450SS

COOKTOP FEATURES

- 4 Induction Cooking Zones
- XL Cooktop Surface
- Residual Heat Indicator

RANGE FEATURES

- Contemporary European Design
- True European Convection
- Industry-leading Oven Capacity (5.7 cu. ft.)
- Programmable Self-clean Oven

RANGE ACCESSORIES

TRIM KIT
CW3001 (Stainless Steel)
CW3002 (Black)

Give your kitchen a perfectly finished look by seamlessly integrating your Blomberg range and creating a no-crumb zone between your range and countertop.

GRIDDLE
G3001

Fits across burners on 30-inch gas ranges and turns your kitchen into a restaurant in short order! Make eggs, sausage, and pancakes for breakfast, then enjoy perfectly grilled steaks for dinner.

WOK RING
119240080

This is an adapter that can be added to your range to assist when using a wok pan. The Wok Ring holds the pan in place for easy use.

REFRIGERATORS

Blomberg's sleek refrigerators harmonize

contemporary design sensibilities with the highest

performance and efficiency standards. Whichever

style you choose, the counter-depth design

provides a seamless space in which to let your

culinary imagination soar while your ingredients

are kept easily in reach and at their peak.

CONTEMPORARY EUROPEAN DESIGN

Blomberg refrigerators harmonize refined design sensibilities with the demand for functional excellence. Thoughtful decisions

may include a streamlined counter-depth design for the clean sight lines you covet, reversible doors for ultimate flexibility,

plus a luxurious stainless steel finish that resists fingerprints and makes cleaning effortless.

Boldly beautiful European-style handles combine sophistication and strength to complement both your aesthetics and your active life. Inside, a prominent digital display puts complete control within easy reach and theatrical LED lighting brilliantly illuminates every corner while conserving energy.

IN HARMONY WITH NATURE

Blomberg understands living well also means living responsibly. It's a distinction that earned us the ENERGY STAR® 2018 Partner of the Year award. Featuring innovative technology that safeguards your food and ensures maximum freshness, our ENERGY STAR-certified refrigerators also conserve energy, save money, and help protect the planet. Our refrigerators are built with 99.9% lead-free materials, 100% free from ozone-depleting greenhouse gases, and manufactured with 85% recyclable components.

Features available on select models only.

DUO CYCLE COOLING

Ingenious Blomberg refrigerators are equipped with advanced multi-cycle, no-frost, silent cooling technology. Independently zoned and controlled cooling systems maintain even air temperature and humidity in separate freezer and fresh-food compartments, delivering enhanced food preservation and maximum energy efficiency. No air transfer between compartments means food in the freezer section freezes faster, items in the refrigerator stay fresher longer, and odors don't circulate.

BLUE LIGHT TECHNOLOGY

Exclusive Blomberg Blue Light Technology represents a breakthrough in keeping fruits and vegetables fresh and juicy long after they're picked. Continuous blue light rays illuminate the crisper and allow the natural process of photosynthesis to continue, prolonging storage life and preserving natural flavors, colors, textures, and nutrients.

IONFRESH

This exceptional Blomberg technology simulates a natural process to bring pure freshness to your kitchen. By producing negative ions inside the refrigerator, IonFresh captures and neutralizes airborne bacteria, odor-causing microbes, and ethylene gas, while extending the life of fresh fruits and vegetables and keeping circulated air clean and smelling fresh.

HEIGHT-ADJUSTABLE SHELVES

Blomberg believes refrigerators should be adaptable as well as beautiful. Our expansive glass shelves are cantilevered at the back so you can use every inch of space for storage. Plus, with a simple motion they can be manually adjusted up or down three inches to accommodate anything from the holiday turkey to a towering layer cake.

INTERIOR THEATRE LIGHTING

Blomberg ventures beyond the conventional with theatrical LED lighting on the top and side walls that perfectly illuminates the interior and contents of your refrigerator, yet conserves energy.

PANTRY DRAWER

An ingenious addition to the modern refrigerator, this full-width shallow drawer is ideal for storing cold cuts, cheeses, and small packages that can easily get pushed to the back of the shelves and out of sight. It is also a handy solution for storing drink boxes and snacks where the kids can help themselves.

AUTOMATIC ICE MAKER

Whether you are getting ready for a big party or just keeping up with your busy family life, there is never a need to rush out and buy ice. The turbo charged automatic ice maker can produce up to 11 pounds of crystal-clear ice per day.

LARGE FREEZER DRAWER

Generously sized freezer storage drawers fit the Blomberg lifestyle perfectly. The main compartment has a large capacity that offers plenty of accessible room, while the sliding bin gives you the flexibility to store smaller items within easy reach.

METAL FREEZER DRAWER

Quality details such as a spacious, durable, all-metal freezer drawer set Blomberg appliances apart.

SOFT-CLOSE CRISPER

All your fresh fruits and vegetables are not only safely stored but also easy to see and reach in this specially designed crisper drawer. Drawer rails feature built-in wheels for smooth opening and quiet closing.

90˚ FLUSH HINGE

For a truly custom look, Blomberg's specially engineered hinge allows the refrigerator door to open a full 90 degrees and stay flush with the opening.

WINE RACK

Featured in certain Blomberg refrigerators, this versatile chrome bottle holder suspends from a shelf to provide convenient extra storage. Ideal for chilling wine or keeping tall bottles of cold water on hand, this practical accessory makes the most of every inch of space.

INTERIOR FILTERED WATER DISPENSER

To preserve the integrity of Blomberg's contemporary European design, the water dispenser is on the inside of the refrigerator, instead of the outside. Enjoy all the convenience and great taste of chilled, filtered water at the touch of a button, plus the elegance and clean, sleek lines that blend so beautifully with your kitchen décor.

30" BUILT-IN, EASY-TO-READ, LARGE DISPLAY

Blomberg refrigerators feature bright, accessible digital displays that simplify programming and put you in control of performance.

SABBATH MODE

This convenient feature makes it simple to observe the rules of the Jewish Sabbath. Just set the special mode in advance, and the lights inside the refrigerator and freezer compartments will not turn on when the door is opened.

DISHWASHERS

A Blomberg dishwasher is the perfect complement

to your full, fabulous, active life. Generously sized

and designed for flexible loading, it offers easy,

quiet, efficient cleanup whether on busy weeknights

or after a big, bountiful dinner party. Every

innovation is designed to save you time and effort

and make the good life even better.

IN HARMONY WITH NATURE

Blomberg believes your home should be as smart as you are, in every sense of the word. That includes performing flawlessly while protecting the planet. It's a philosophy that earned us the ENERGY STAR® 2018 Partner of the Year award and elevated our dishwashers to the 2018 ENERGY STAR Most Efficient list, which recognizes products delivering cutting-edge energy conservation with the latest in technological innovation.

Features available on select models only.

SELF-CLEANING FILTER

For this exceptional dishwasher, Blomberg
created a self-cleaning filter technology that
delivers the ultimate in both convenience and
sustainable performance. Pressurized water is
pumped through a rotating sprinkler to break
down and rinse away any food residue inside
the filtration system.

Monthly use not only extends the active life of the
filter by up to a year, but also ensures sparkling
clean dishes and helps prevent odor buildup.
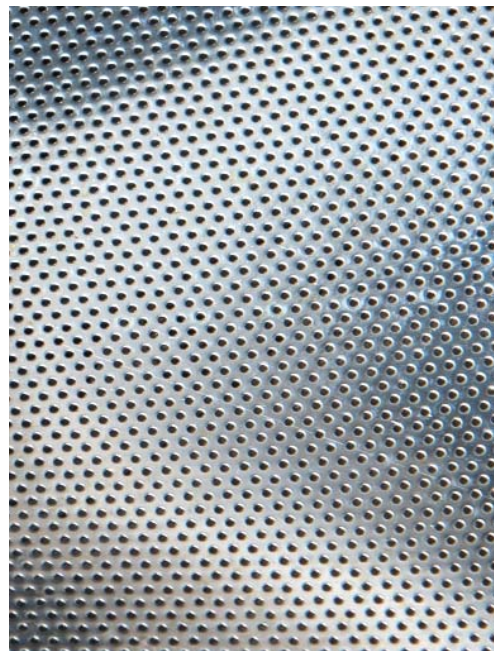

SILENT OPERATION

When your home is your sanctuary, you don't want to have to leave the room or only run the dishwasher late at night. Quality engineered with three layers of noise-suppressing insulation and advanced Brushless DC™ motor technology that optimizes working speed and lowers wash-cycle noise, Blomberg dishwashers are among the quietest on the market.

POWER WASH

Your full, fabulous, active life can get messy. This Blomberg dishwasher deals with it beautifully by creating a high-pressure power zone in the right-hand side of the lower rack. The specially designed 180-degree rotating arm features a 360-degree rotating head that reaches every single angle with an intense spray perfect for cleaning heavily soiled pots and pans.

TURBO FAN DRYING

Blomberg's turbo fan drying system uses a fan to increase air circulation in the dishwasher. This active ventilation speeds up the drying process, improves drying performance, and leaves dishes cooler to the touch when the program is finished.

STAINLESS STEEL INTERIOR

Manufactured with the best stainless steel materials available, the interior of every Blomberg dishwasher performs as beautifully as it looks. In addition to resisting hard water stains, spots, and corrosion for better durability, it absorbs noise more efficiently than plastic tubs and can be heated to the highest washing temperature on the market—167°F—to completely sanitize your dishes.

FLOW-THROUGH HEATER & TURBO FAN DRYING

To provide a safer and more convenient alternative to the conventional exposed heater, Blomberg uses a concealed heater that allows plastic dishware to be placed on both top and bottom racks without damage.

3-WAY FILTRATION SYSTEM

A dishwasher is only as good as its filtering system. Blomberg uses a highly effective three-way filtering system developed for high-end European machines that removes even the smallest food particles and ensures circulation of clean water.

DOUBLE MOTION FLOAT SYSTEM

Blomberg's double motion float system provides maximum security against water damage. The enhanced anti-leak system uses two float sensors to intelligently detect excess water collection or operational problems and automatically activate the drain pump and/or shutoff valve. A bottom tray prevents flooding, while a double-walled hose offers an additional layer of protection.

FULL-SIZE THIRD RACK

One of the most popular features among high-end dishwashers, this versatile rack is tailor-made for those occasions when you need to create extra space for cutlery and small items. Its clever vertical adjustment means you can lower the rack to accommodate a taller espresso cup or lower it to make room in the top rack for tall glasses.

INNER ILLUMINATION

To make loading and unloading the dishwasher easier, Blomberg added inner illumination that offers a clear view of every corner.

FLEXIBLE RACK LOADING

Designed for ultimate convenience, Blomberg dishwashers accommodate all types of dishes, cutlery, and cookware comfortably. Flexible racks, shelves, and baskets can be moved, reconfigured, or customized to meet your exact needs for each load.

ADJUSTABLE UPPER RACK

When the need arises, the hardworking upper rack can be raised to make room for pans, platters, and trays in the bottom rack or lowered to accommodate tall glasses up top. The rack allows you to adjust the height in one simple action, even when it's fully loaded.

CUSTOMIZABLE BOTTOM RACK

Load without limits! Create a completely flat lower rack to fit bulky pots and pans or a custom configuration that allows the proper placement of uniquely shaped items for thorough cleaning. Simply fold down the individual tines and load this multipurpose rack with anything from extra-long utensils and roasters to extra glasses and cups that didn't fit on top.

SIZED RIGHT

Blomberg dishwashers are designed for today's lifestyles, including generously proportioned racks that accommodate dinner plates up to 13 inches in diameter, as well as oversized serving dishes, your favorite cooking pots, and lots of glassware.

SPLIT FLIP SHELVES

Maximize space, capacity, and versatility in the upper rack by flipping these smart side shelves up or down. Leave them in the up position to wash tall glasses. Flip them down to wash long utensils and espresso cups at the same time. Or do both! These special shelves are split. Flip one half down to wash two levels of short brandy glasses and leave the other half up to fit champagne flutes.

Features available on select models only.

SLIDING CUTLERY BASKET

Everything fits more easily when you have options.
This clever cutlery basket can be placed anywhere
in the front row since it slides side to side.

SMARTFOLD
PLATE SUPPORTS

Adding even more flexibility, this unique design feature lets
you fold down plate supports in the upper rack to maximize
and customize space and allow larger items to be easily
washed on top.

ALL-IN-1 TABLET FUNCTION

This intelligent function assures our dishwashers deliver optimum performance with improved convenience when using detergent tablets. Simply insert a tablet and slide the cover into place.

MIXWASH+

During the same wash cycle, this brilliant dual water pressure program applies gentle pressure to the upper basket for delicate glass and china, plus 60-percent higher pressure to the low basket to get even heavily soiled pots and pans thoroughly clean.
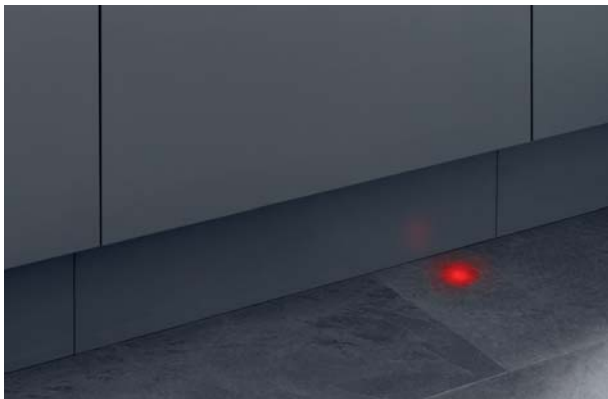

LED SPOT

Your Blomberg dishwasher may be so quiet you might not know it's on. A red light indicator on the floor at the base of the dishwasher means you can tell with just one quick look whether it's running or not.

WIFI CONNECTIVITY THROUGH HOMEWHIZ

Remotely check the cycle status, monitor dishwasher performance, or order supplies—all from your mobile device.

Features available on select models only.

COMPACT LAUNDRY

The sensory delights of fresh, clean laundry

are provided along with energy efficiency, high

functionality, and flexibility in Blomberg's signature

compact washers and dryers. Each intelligent solution

is based on cutting-edge technology and advanced

design techniques that optimize performance for both

large and small living spaces.

COMPACT WASHER AND COMPACT DRYER

Blomberg knows an upscale urban lifestyle often puts space at a premium, but that doesn't mean sacrificing style or superior performance. Our 24-inch compact washers and dryers fit in perfectly, offering flexibility and freedom in installation (including an optional stacking kit), plus all the functionality and finesse required for expert clothing care. Despite their compact size, these machines handle large loads — 2.5 cu. ft. washer capacity and 4.1 cu. ft. dryer capacity — while offering a variety of cycles for different fabrics.

IN HARMONY WITH NATURE

We believe a commitment to living consciously should extend to clothing care, so Blomberg brings intelligent energy and water conservation to the laundry room. All of our washers are ENERGY STAR® certified with features such as automatic water adjustment for each load, and our dryers utilize the ENERGY STAR Most Energy Efficient award-winning Ventless Heat Pump Dryer. For the ultimate energy efficiency duo, pair washers and dryers that are recognized as ENERGY STAR Most Efficient in 2018.

SPECIAL WASH CYCLE PROGRAMS

Designed to be in perfect harmony with your life, Blomberg washers offer up to 12 special washing programs that automatically adjust to specific laundry situations or different textiles — from delicate lingerie to heavy-duty work clothes. The result is consistently clean, fresh, well-cared-for clothing and linens with little effort and no guesswork on your part.

SUPER QUICK 20

When time is of the essence, Blomberg offers a super-fast cleaning cycle for small loads of lightly soiled or unstained clothes or items you've only worn once.

PET HAIR

To thoroughly remove pet hair from fabrics and leave them looking fresh, this special auxiliary function augments the normal wash cycle with additional prewash and rinsing steps, plus a longer heating period.

JEANS

Specially designed to gently but thoroughly launder thicker fabrics, this special program automatically adjusts to a higher water level and adds an extra rinse cycle. Garments come out spotless with no remaining traces of detergent.

JOGGING WEAR

Exercise this option when frequently washing and refreshing your daily workout clothes. It's ideal for small loads and works equally well on sportswear made from cotton, synthetics, or blends.

ANTI-CREASE

Add this function when you want your clothes to come out of the wash with fewer wrinkles.

BEDDING

For large families with lots of bed linens to change and towels to wash, Blomberg's 24-pound-capacity washers perform beautifully and efficiently. Just set the special program and wash up to five sets of double sheets or 14 plush towels in a single load.

Features available on select models only.

LIQUID DETERGENT COMPARTMENT

Blomberg's washing machines are state of the art and fully in tune with the way laundry gets done. The easy-to-use liquid detergent compartment is right in step with delivering the best washing conditions for today's different kinds of fabrics.

GENEROUS DRUM CAPACITY

Despite their compact size, Blomberg washers can wash 2.5 cu. ft. of laundry per load thanks to a roomy and deep drum design that easily handles bulky items and heavy loads, including 14 bath towels.

MAXIMUM WATER EFFICIENCY

All Blomberg washers are ENERGY STAR® certified for conserving energy and water. Each machine features an automatic water adjustment system that calculates the volume of laundry, so every load uses only the amount of water required to spotlessly clean and thoroughly rinse—not a drop more—and you can wash a small load as economically as a large one.

OPTISENSE

Blomberg's cutting-edge OptiSense technology provides maximum control over everything from water consumption and energy efficiency to detergent amount and even the time it takes to do the wash. Four smart sensors—Water Temperature, Foam, Wash & Spin, and Power Protection—automatically trigger optimal washing conditions, ensure safe operation (even during power fluctuations), and help avoid flooding.

REVOLUTIONARY HEAT PUMP DRYER TECHNOLOGY

This compact dryer not only takes up less space, but with up to 50% higher energy efficiency, it's small in environmental impact too. Using a closed-loop heat exchange system, this ENERGY STAR® Most Energy Efficient award-winning Ventless Heat Pump Dryer uses lower temperatures to dry the load, so it saves money on energy bills while saving wear and tear on your clothing. Plus, it maintains a completely humidity-free environment.
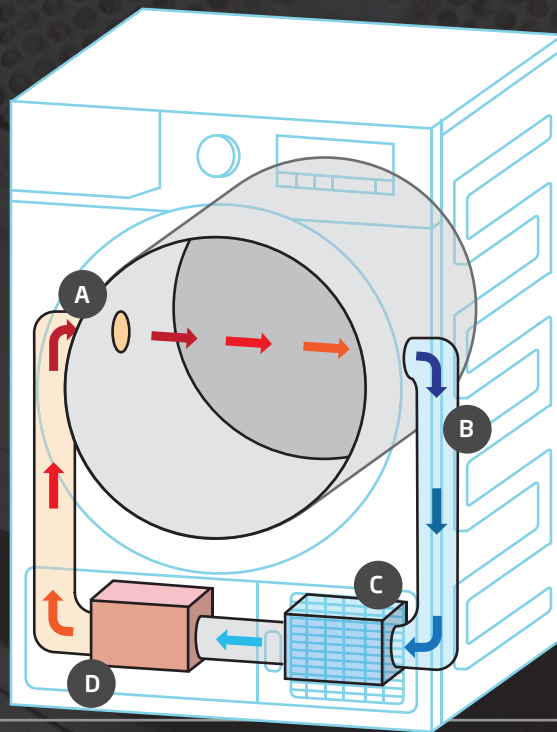

HOW IT WORKS **A** Blomberg's heat pump technology pumps warm, dry air into the drum to mix with moisture-laden laundry. **B** The moist air leaves the drum. **C** The air passes through the evaporator where air is cooled and humidity is removed. **D** The remaining air is reheated in the condenser (heat pump) through the exchange of compressed coolant and sent back to the drum to continue the drying process.

DIRECT DRAINING

Innovative heat pump dryers from Blomberg are engineered for optimal safety and efficiency, including the condenser system. A calibrated water level sensor identifies any deviation from the correct water level in the tank and automatically starts draining if the level is exceeded.

SPECIAL DRUM PADDLES

The drum paddles in Blomberg's heat pump dryers are uniquely shaped to ensure more uniform drying as well as less creasing. They also prevent twisting and tangling when drying large, bulky items such as bedsheets and duvets.

ELECTRONIC DRYER CONTROLS

Blomberg believes laundry care should be elegantly simple. Our ergonomically positioned, fully electronic LCD digital controls are especially user-friendly. The control panel helps you by suggesting the correct settings for getting the very best results. Then simply press "start" and go.

ANTI-CREASE OPTION

The gentle drum action of a Blomberg dryer separates and smooths out individual garments as they dry, so when the cycle finishes, clothes come out wrinkle-free and ready to wear. But just in case you're not immediately available when the cycle stops, this clever option keeps the drum rotating periodically for up to two hours to keep your clothes from creasing.

QUICK DRY

Blomberg's advanced ventless heat pump dryers offer more than just energy conservation. An 8.45-pound load will dry in less than one hour. They also help your clothes last longer by utilizing faster drying and cooler temperatures to reduce friction and shrinkage.

GENTLE CARE

Blomberg's closed-loop heat exchange system means our heat pump dryers use a 40% lower circulating air temperature than conventional dryers. This gentle care program helps keep all fabrics — even woolens — at their best.

JEANS

Blomberg understands today's many fabric choices place different demands on laundry equipment. Weightier textiles such as denim are difficult to dry using normal drying cycles. Our special jeans program is specially calibrated to dry denim, fleece, and other heavy fabrics with optimal results in a minimum amount of time.

4.1 CU. FT. CAPACITY

Blomberg knows space is often at a premium, but that doesn't mean style or superior performance should be sacrificed. Despite their compact size, our dryers deftly handle 4.1 cu. ft. loads with a variety of cycles for different fabrics — including 14 bath towels.

EASY-ACCESS LINT FILTER

Keeping your dryer's filter free of lint is essential for safety and efficiency. Our dryer filters are easily accessible and easy to clean to improve dryer performance and provide hassle-free upkeep.

INTERIOR LIGHTING

Blomberg believes no detail should be overlooked when designing superior appliances. Our heat pump dryers feature a bright interior LED light to help you spot that last sock and make unloading easier.

STAINLESS STEEL DRUM

Fully resistant to nicks and scratches from metal zippers, buttons, and rivets, our shiny stainless steel drum will keep its stylish good looks for a lifetime.

Meets CEE Specifications

24" FRONT LOAD WASHER

WM98400SX2

KEY FEATURES

- Compact Front Load Washer
- Maximum Water Efficiency
- 1,400 RPM Maximum Spin Speed
- Electronic Controls
- Liquid Detergent Compartment
- 2.5 cu. ft. Capacity
- Woolmark Apparel Care, Certified Wool Cycle
- OptiSense Sensors
- Rinse Sensor
- Internal Water Heater
- Child Lock
- Lifetime Stainless Steel Drum
- Chrome Door Rim

16 WASHING PROGRAMS

- Pet Hair Removal Plus
- Super Quick 20 min.
- Quick Wash 35 min.
- Bedding
- Jogging Wear
- Jeans
- Heavy Soil
- Soak
- Extra Rinse
- Normal/Regular Cotton
- Permanent Press
- Hand Wash
- Woolens
- Drain + Spin
- Tub Sanitize

DIMENSIONS (H x W x D)

33 $\frac{1}{8}$ x 23 $\frac{5}{8}$ x 25 $\frac{3}{8}$ in.

Washer operates on 208–240 V only and is designed to plug directly into a Blomberg companion dryer. (Outlet provided on rear of dryer will not operate on 110 V.)

Meets CEE Specifications

24" FRONT LOAD WASHER

WM77120

KEY FEATURES

- Compact Front Load Washer
- Maximum Water Efficiency
- 1,200 RPM Maximum Spin Speed
- Electronic Controls
- Liquid Detergent Compartment
- 1.95 cu. ft. Capacity
- Rinse Sensor
- Internal Water Heater
- Child Lock
- Lifetime Stainless Steel Drum
- White Door Rim

12 WASHING PROGRAMS

- Quick Wash 35 min.
- Jogging Wear
- Jeans
- Soak
- Extra Rinse
- Super Wash
- Anti-creasing
- Normal/Regular Cotton
- Permanent Press
- Hand Wash
- Delicates
- Woolens
- Drain + Spin
- Baby Sanitize

DIMENSIONS (H x W x D)

33 $\frac{1}{8}$ x 23 $\frac{5}{8}$ x 22 $\frac{3}{4}$ in.

Washer operates on 208–240 V only and is designed to plug directly into a Blomberg companion dryer. (Outlet provided on rear of dryer will not operate on 110 V.)

24" VENTLESS HEAT PUMP DRYER

DHP24412W

Most Efficient 2018
ENERGY STAR
www.energystar.gov

KEY FEATURES

- Compact Front Load Dryer
- Ventless Heat Pump Dryer Technology
- 4.1 cu. ft. Capacity
- Electronic Controls
- Inner Illumination
- Child Lock
- Stack Kit Included
- Reversible Door
- Direct Draining
- Special Drum Paddles
- Lifetime Stainless Steel Drum
- Chrome Door Rim
- Easy Access Lint Filter
- Saves 50% More Energy

16 DRYING PROGRAMS

- Anti-creasing
- Quick Dry 30 min.
- Jeans
- Gentle
- Normal/Regular Cotton
- Permanent Press
- Delicates
- Bulky
- Air Fluff/No Heat
- Woolens
- Baby Sanitize
- Silent Program
- Jogging Wear
- Timed Dry: 10-20-30-40-50-60-70-80-100-120-140-160 min.

DIMENSIONS (H x W x D)

33 $\frac{5}{16}$ x 23 $\frac{3}{8}$ x 26 $\frac{9}{16}$ in.
30 Amp circuit breaker required. Blomberg companion washer operates on 208–240 V and plugs directly into outlet on rear of dryer. (Outlet is for Blomberg washers only.) Dryers are only supplied with a four-prong plug from the factory, but can be converted at the time of installation.

24" VENTED ELECTRIC DRYER

DV17542

KEY FEATURES

- Compact Front Load Dryer
- 3.7 cu. ft. Capacity
- Child Lock
- Stack Kit Included
- Lifetime Stainless Steel Drum
- Easy Access Lint Filter
- White Door Rim

15 DRYING PROGRAMS

- Anti-creasing
- Normal/Regular Cotton
- Permanent Press
- Delicates
- Mixed Fabric
- Jeans
- Timed Dry: 15-30-75 min.

DIMENSIONS (H x W x D)

33 $\frac{1}{8}$ x 23 $\frac{1}{2}$ x 21 $\frac{7}{8}$ in.
30 Amp circuit breaker required. Blomberg companion washer operates on 208–240 V and plugs directly into outlet on rear of dryer. (Outlet is for Blomberg washers only.) Dryers are only supplied with a four-prong from the factory, but can be converted at the time of installation.

TECHNICAL DETAILS

The details that give you the peace of mind

you've been after. The numbers that bring

harmony to your life. These features make

Blomberg products stand the test of time.

Now you can have the confidence to effectively

select the product that's just as good for the

environment as it is for you.

*
Required when operating a Blomberg washer and dryer on the same circuit. The washer plugs into the rear of the dryer. This is why a 208–240 V / 30 Amp circuit breaker is required. Machines should not be directly connected to any other brand washer or dryer.

3 Wire Connection
10-30R Receptacle
208-240 V / 30 Amps

4 Wire Connection
14-30R Receptacle
208-240 V / 30 Amps

Dryers are only supplied with a four-prong plug from the factory, but can be converted at the time of installation.

Warranty for All Products: 1 Year Full, 2 Year Parts, 5 Year Sealed System Parts

COOKING

GRIDDLE
G3001

Adding Blomberg accessories, such as the special griddle attachment for the center oval burner, can add to your cooking experience.

WOK RING
119240080

This is an adapter that can be added to your range to assist when using a wok pan. The Wok Ring holds the pan in place for easy use.

SIDE TRIM KIT
CW3001 (SS)   CW3002 (BK)

Side trim fills the gaps between the counter and the range for a more professional look. Available for 30" and Slide-in models.

REFRIGERATORS

WATER FILTER
4874960100

Replacement water filter for units with built-in water dispenser.

DISHWASHERS

STEMWARE RACK
1752850100

Stabilize delicate stemware for bottom rack washing.

LAUNDRY

UNIVERSAL STACKING KIT
2992100300

Add a stacking kit so you can place your dryer on top of your washer to save space.
